

PROFESSIONAL SUMMARY

IT professional with 4 plus years of experience in business analysis, data analytics, process optimisation, product development, User research, strategic management, and cybersecurity framework implementation. Proven track record translating complex business requirements into scalable technology solutions across healthcare, compliance, automation, and cybersecurity domains. Skilled in end-to-end product lifecycle management, stakeholder collaboration, Agile delivery, BRDs, PRDs, Power BI dashboards, and CRM analytics.

CERTIFICATIONS

- Professional Scrum Master.
- Oracle Analytics Cloud
- Azure-900 (Cloud) certification.
- Google Cloud Certification.
- Highest Performer Certificate in Information Technology in Business Analysis.

PROFESSIONAL EXPERIENCE

Business Analyst

CognitiveBotics | Global HealthX | India | 10/2025 - Current

- Served as a Business Analyst Subject Matter Expert (SME) and Solution Architect for a Patient Relationship Management (PRM) system, defining module workflows, functional architecture, and solution requirements supporting government disease-burden initiatives.
- Led end-to-end requirements gathering through stakeholder interviews, workshops, and domain collaboration sessions.
- Contributed to Zensens.ai product documentation and strategic enhancements.
- Leveraged Generative AI and prompt engineering to draft and refine PRDs, user stories, acceptance criteria, and functional requirements.
- Designed Business Process Models and workflow diagrams using Microsoft Visio to support system design and development. Used Amplitude for user behavior analytics, tracking journeys, engagement, feature adoption, and drop-offs.
- Translated business requirements into user stories and acceptance criteria in Agile/Scrum environments using JIRA.
- Designed data-driven e-learning features and custom CRM dashboards aligned with client-defined KPIs to support data-driven decision-making.
- Performed vite coding using Lovable and Claude, GPT through MCP connectors, supporting application development and backend management using Supabase.
- Coordinated User Acceptance Testing (UAT), validated test cases, and ensured business requirement compliance before release. Designed automation process flows, functional scripts, and AI-driven workflows within CognitiveBotics.
- Led change management activities, handling requirement modifications, scope updates, and stakeholder communication.
- Managed multiple projects simultaneously, ensuring adherence to scope, timelines, and quality standards.
- Contributed to a healthcare platform covering EMR, EHR, HMS, HIS, PHR, and CRM modules.
- Initiated Copilot integration to enhance automation efficiency and productivity within CognitiveBotics.
- Represented the organization at industry conferences to promote venture studio initiatives and product offerings.
- Collaborated with cross-functional teams to translate business requirements into AI-enabled product workflows, aligning functional requirements, automation opportunities, and user needs with solution objectives.
- Supported AI-assisted product development and enhancement through iterative requirement refinement, workflow validation, and functional testing, ensuring solutions remained aligned with defined business requirements.

Business Process Analyst

Robinson Solutions (Toyota - TMMC) | Canada | 09/2024 - 04/2025

- Gathered and analyzed business and technical requirements for IT risk management and security governance initiatives; collaborated with stakeholders to identify IT/security risks, control gaps, and process deficiencies.
- Led end-to-end transformation of enterprise security architecture supporting migration to Zero Trust Network Architecture (ZTNA); supported evaluation, planning, and rollout of 15+ security tools under the Zero Trust framework.

- Conducted cost analysis, vendor evaluation, and negotiation support; created business cases, ROI analysis, and comparative assessments for executive decision-making on security investments.
- Facilitated stakeholder meetings and cross-functional discussions; monitored implementation progress and coordinated with technical teams on milestones and deliverables.

IT Business Analyst
Connestoga College - Capstone Project | Canada | Jan 2025 – Apr 2025

Led business analysis for a cybersecurity capstone project at Conestoga College, implementing security architecture across internal and third-party integrations in alignment with ISO 27001, PCI-DSS, and GDPR compliance standards.

Business Analyst
Lance Soft | India | 11/2022 - 12/2023

- Collected and documented BRDs, FRDs, and NFRDs for patient policies, claims processing, HIPAA compliance, and regulatory requirements.
- Worked with stakeholders to improve member enrollment, eligibility verification, and claims adjudication processes; supported implementation of healthcare systems for new enrollments, renewals, cancellations, and endorsements.
- Built Power BI dashboards tracking claims denial rates, coverage lapses, and premium collections; integrated EHR/EMR, ICD/CPT, and enrollment data; created data models, DAX measures, and Power Query transformations.
- Automated compliance and regulatory reports for HIPAA, Medicare/Medicaid, and billing audits; delivered executive scorecards and process flow visuals for decision-making in claims, enrollment, and policy administration.

Business Data Analyst
Tech Mahindra | India | 12/2021 - 10/2022

- Collaborated with stakeholders to gather, analyse, and document business requirements, creating detailed Business Requirement Documents (BRD).
- Built Power BI dashboards and reports to track KPIs and support business decisions.
- Used dynamic Row-Level Security (RLS) to control data access for different users.
- Improved dashboard speed and performance by optimising data models and queries.
- Cleaned and structured data using normalisation and transformation techniques for accurate reporting.
- Worked with stakeholders to gather requirements and document them clearly.
- Prepared easy-to-follow process flowcharts and diagrams to explain workflows.
- Acted as a bridge between Nissan Automotive and the development team to align on needs.

Technical Associate | 10/2020 - 02/2021

- Utilized SIIAM tool to manage and track incidents; diagnosed and resolved network-related issues using SQL queries; provided technical support for Telstra’s telecommunication network.

EDUCATION

Postgraduate, Information Technology in Business Analysis **89.5%**
 Conestoga College, Canada (2024-2025).

Bachelor’s in computer science **75%**
 Malla Reddy College of Engineering, India. (2016-2020)

TECHNICAL SKILLS

- **Tools:** Angular, Power BI, Tableau, ETL, SSMS, Excel, Visio, Jira, Amplitude and Confluence.
- **Languages:** SQL, Python, Window Functions.
- **Web Tools:** HTML, CSS, Bootstrap.
- **Product Management:** PRD’s, Change Management, Stakeholder Management, Use Case & stories Development, Defining KPI’s, Go to Market Support, Feature Prioritization, UAT Coordination & Release Management. Product life cycle Management
- **Business Analysis:** Requirement Gathering & Elicitation, Documenting business requirements (BRD’s, SRD’s, FRD’s & NFRD’s), Business Process Modelling (BPMN, UML), SWOT Analysis, Lean Process Improvement, Benchmarking, Gap Analysis, Agile & Scrum Methodologies, Risk Analysis, Cost Analysis and Estimation.
- **Data Analysis & Business Intelligence:** Data Migration, Data Validation, Risk Data Analysis, Data Lineage.
